Gentlemen of the FCC:

I benefit greatly from XM Satellite Radio service. I depend upon its traffic and weather channels when I travel. There is no substitute for the uniform coverage and accessibility that I have via satellite radio. It provides me with a wide variety of quality programming that is not available in smaller markets, or often in large markets for that matter. I pay for these services and it should not be up to the National Association of Broadcasters or other competing interests to dictate what I can hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's, and SIRIUS for that matter, ability to provide the kind of programming that I wish to have.
